Fats, oils and grease interceptor service record

A written record of all maintenance, cleaning and inspection of your fats, oils and grease (FOG) interceptor must be kept on file for two years. The form below is also available on calgary.ca by searching "FOG Record."

Date	Employee or Contractor name (who cleaned the trap)	Condition of interceptor (good, fair, poor)	Requires repair Y/N	Grease layer* (%)	Solids layer* (%)	Water layer (%)

*The combined total of the Grease layer (%) + Solids layer (%) should NOT be more than 25%. The water layer should always be 75% or more and traps must be cleaned every 4 weeks or more often as required.
