RE: Exemption Granted to Mandatory Stage 4 Outdoor City Potable Water Use Restrictions for Outdoor Snow Making

---

Pursuant to section 20(8) of the Water Utility Bylaw 40M2006, I hereby grant an exemption for WinSport to use City Potable Water for the purpose of making snow at the WinSport facility **effective November 23, 2026 at 10:01 pm ABT and ending November 24, 2026 at 7:01 am ABT not to exceed a total of 8 hours and 3 million litres.** The City will be monitoring system capacity during this time and may require WinSport to immediately cease the use of City Potable Water for the purpose of making snow.

In evaluating the exemption, The City considered a range of relevant factors, including current and forecasted water system conditions. These included sustained water demand below 500 million litres per day across the entire City water system, including regional customers, for the previous three days; forecasted demand below 500 million litres per day during the exemption period; and stability in the distribution system, including treated reservoir levels and available fire flows. Taking these and other relevant factors into account, I have determined that granting the exemption is appropriate.

The exemption applies solely to WinSport located at 88 Olympic Way SW for snow making and does not apply to other outdoor uses, other customers, or other locations.

Regards,

Nancy Mackay
