The project

Vision

The permanent public artwork will enhance the site by creating an environment that is welcoming, aesthetically interesting and engaging for pedestrians, transit riders and motorists. Consideration must be given to the public nature and regular daily use of this location. The artwork should reflect the community and incorporate feedback collected from residents and businesses through engagement. The work should also demonstrate a thorough understanding of the unique makeup and attributes of this area of the city.

Collaboration & public input

The artist or artist team will be expected to work alongside the International Avenue Business Revitalization Zone (BRZ), the capital project team, the neighbouring communities and other selected artists working on related projects in the area to ensure the artwork is reflective of the communities and the people who live, work and travel here.

The artist or artist team will be required to attend and participate in a series of engagements with the local community beginning in September 2019, including pop-up events, in-person engagement sessions and community discussions, prior to the concept(s) being developed.

Artists interested in this project will be keen on working with local businesses and residents from different backgrounds and ages, and will draw inspiration from the diverse cultures found in the area.

Sites

Two sites (Site A and Site B) will be selected for artwork along International Avenue (17 Avenue SE). The specific locations are not yet known and will be determined through consultation with the community and BRZ during summer 2019, prior to the artists or artist teams being selected. A site will be assigned to each successful artist or artist team through the Public
