# 2013 Bicycle Volume Flow Map 16 Hour (06:00-22:00) 2-Way Totals

## Legend

### 16 Hr Volumes

The data represented in this map are 2-way volumes collected from spring to fall between 2010 & 2013. The data came from a variety of sources including:

- 6 hour bike turning movements
- 6 hour traffic counts
- 16 hour screenlines

6 hour counts were factored to 16 hours using screenline data. Only segments, within the flow map boundary, where data was available are depicted on this map. As data collection increases, over time, additional links will be populated. Bicycle Lane & On-Street Bikeway identify roadways with bike markings. These markings may be on either or both sides of the roadway.

Information contained herein is intended, designed, and collected for specific municipal purposes and may not be suitable for other applications. The City of Calgary accepts no responsibility or liability which may arise from any incorrect or incomplete data or results, or for any improper or inappropriate use or interpretation made by any person.
