

**XV OLYMPIC WINTER GAMES
INVENTORY TO THE OLYMPIC PLANS
AND MISCELLANEOUS OVERSIZE RECORDS**

PREFACE

The City of Calgary Archives is an administrative unit in the City Clerk's Department. The Archives was established in 1981. The descriptive system currently in use was established in 1991. The Archives Society of Alberta has endorsed the use of the Bureau of Canadian Archivists' Rules for Archival Description as the standard of archival description to be used in Alberta's archival repositories. In acting upon the recommendations of the Society, the City of Calgary Archives will endeavour to use RAD whenever possible and to subsequently adopt new rules as they are announced by the Bureau.

The focus of the City of Calgary Archives' descriptive system is the series level and, consequently, RAD has been adapted to meet the descriptive needs of that level. RAD will eventually be used to describe archival records at the fonds level.

The City of Calgary Archives creates inventories of records of private agencies as the basic structural finding aid to private records. Private records include a broad range of material such as office records of elected municipal officials, records of boards and commissions funded in part or wholly by The City of Calgary, records of other organizations which function at the municipal level, as well as personal papers of individuals. All of these records are collected because of their close relationship to the records of the civic government, and are subject to formal donor agreements.

Personal papers, included in the general category of Private Records, are described in Registers. These Registers are similar in purpose and content to an inventory, but take into account the characteristics which distinguish such collections from records.

The search pattern for information in private records is to translate inquiries into terms of type of activity, to link activity with agencies which are classified according to activity, to peruse the appropriate inventories to identify pertinent records series, and then to locate these series, or parts thereof, through the location register. Inventories of private records can also be accessed through the inventory of any civic department to which it might happen to be linked.

Existing inventories of private records are revised as additions of records are received and described at the Archives.

INTRODUCTION

The plans, maps and other oversize material described in this inventory number approximately 3500 in total. All material came into the custody of the City of Calgary Archives with the rest of the records of OCO'88, the organizing committee for the XV Olympic Winter Games, held in Calgary in 1988 February, and were acquired by the Archives through an agreement signed 1990 January 22 between The City of Calgary, the Calgary Olympic Development Association (CODA) and the XV Olympic Winter Games Organizing Committee. The process of arrangement and description began before that time with the permission of CODA.

The records described in this inventory are part of accession PR-90-001. The original extent of the oversize material was not officially determined at the time of the accession, but because of duplication may be assumed to be almost double the final total of oversize documents described here, that is, approximately 7000 items. The majority of these documents are plans, but other oversize material has also been included and described. See the series and sub series descriptions for further details.

This inventory was prepared by Glenda Leslie in 1999.

ACKNOWLEDGEMENT

The City of Calgary Archives would like to thank the Calgary Olympic Bid Committee 2002 for its generous support in the publication of this inventory.

ADMINISTRATIVE HISTORY

This is an artificial fonds. The precise administrative units which created much of the oversized material described in this inventory were not recorded when these documents were transferred to the City of Calgary Archives after the completion of the Olympic Winter Games in 1988. Most items were individually rolled and stored together with other oversized, rolled material.

An examination of the documents reveals that the oversized plans and maps were most likely produced in the Operations Group, Engineering Department of OCO'88 and are closely related to the records in that series. Other, miscellaneous, items may well have been produced in either the Communications Group or the Team'88 Services Group of OCO'88 and related documents may be found in those records. The oversized planning schedules are related to other planning schedules found in the records of the Finance Group.

Various engineering and architectural companies were responsible for producing the majority of the plans described in this inventory and these companies are referred to in the file listings. A number of plans were also produced directly by OCO'88 and have no references to outside engineering or architectural companies on them.

SCOPE AND CONTENT NOTE

The oversize documents described in this inventory consist of 3,448 plans, 37 posters, five pieces of art (drawings and sketches), three maps, three oversize aerial photo negatives, and a number of miscellaneous oversize items. Because there is no administrative structure to follow for the organization of these records, they have been grouped into two artificial series, the first consisting of the oversize plans and maps, and the second made up of the posters, aerial photo negatives and other miscellaneous items which did not fit into the first series. The majority of plans have been placed into oversize map folders and map cabinets. A few plans have been placed into one oversize box and some miscellaneous oversize items have been placed onto shelves.

Each series has a number of sub series. There are 15 sub series in Series I, arranged by venue. Sub series xiv is made up of plans which were originally bound or grouped together because of the nature of the facility or operation described in the plans rather than by the venue where the construction was taking place. A complete description of the sub series can be found in the series description to Series I.

Series II is made up of the four sub series of miscellaneous oversize material. These sub series are outlined in the series description to Series II.

Most of the plans in this inventory are in paper format, usually in fairly good condition. Where possible, a vellum copy or a mylar copy of a plan was kept, but in some cases, the only copy sent to the archives was the more fragile sepia copy. Often the material used for the plan has been recorded; if this has not been done, the material is most likely paper.

Duplicate copies of plans have been disposed of unless there were reasons to keep

Copyright City of Calgary

similar copies, such as notations or coloured markings. In some cases, the plan number has been recorded along with the title of the plan. This was done in cases where a number of copies of the same plan had been sent to the Archives and it became easier to distinguish similar but different plans by referring to the plan number. In other cases, where similar copies did not have to be distinguished, the plan number was not recorded.

There was no filing system created by the staff of OCO'88 to maintain these oversize items and it is not known whether all oversize plans and maps were transferred to the City of Calgary Archives. While this may be described as a closed fonds, there is no way of determining whether or not any more oversize documents may be transferred to the City of Calgary Archives in the future.

There are no restrictions on the material described in this inventory.

DESCRIPTION OF RECORDS

I. **OCO'88, Plans and Maps Artificial Series. -- 1977-1988. -- Approximately 3437 plans and 3 maps.**

Archival Description: This is an artificial series describing oversize plans and maps according to the major Olympic venues developed in and around Calgary for the XV Olympic Winter Games.

Scope and Content: These records have been divided into 15 sub series arranged by venue and by miscellaneous as follows. Because of the extent of the material in these sub series, tabbed pages have been added to the inventory to ease access to the file listings for these records.

Sub series I: Canada Olympic Park - This is the largest sub series and consists approximately 880 plans.

Sub series ii: Nakiska - This sub series is made of up approximately 400 plans and one map.

Sub series iii: Canmore Nordic Centre - This sub series consists of approximately 260 plans, three pieces of art (drawings) and two maps.

Sub series iv: Town of Canmore Olympic Village II, Recreation Centre and Volunteer Centre - There are 145 plans in this sub series.

Sub series v: McMahon Stadium and Olympic Volunteer Centre - This is made up of 324 plans.

Sub series vi: Olympic Speed Skating Oval - There are 220 plans in this sub series.

Sub series vii: Olympic Plaza - This sub series consists of approximately 120 plans and two pieces of art (sketches).

Sub series viii: Saddledome and Corral - There are 177 plans in this sub series.

Sub series ix: Stampede Park - One of the smaller sub series, there are approximately 45 plans in this sub series.

Sub series x: International Broadcast Centre and Main Press Centre - This sub series consists of approximately 200 plans.

Sub series xi: Arenas - The plans from Father David Bauer Arena (also referred to as Foothills Arena on some plans), Max Bell Arena, the Jimmie Condon Arena and the Norma Bush Arena make up this sub series. There are approximately 170 plans in this sub series.

Copyright City of Calgary

Sub series xii: Media Village and Miscellaneous Olympic Accommodation - Plans for Broadcast Hill Media Village, general Media Housing, Lincoln Park Village, the Owasina Hall Residence on the campus of the Southern Alberta Institute of Technology (SAIT) and the KC Homecentre in Canmore make up this sub series. There are approximately 160 plans.

Sub series xiii: Main Accreditation Centre and Calgary International Airport - This sub series consists of 65 plans.

Sub series xiv: Venues - This sub series consists of plans for various venues which describe gas distribution systems, supply of propane, generator enclosures, theatre seating plans, chain link fencing, broadcast booths, temporary instant structures, and scaffolding. There are approximately 145 plans in this sub series.

Sub series xv: Miscellaneous - This sub series includes plans for City of Calgary facilities, the Calgary Olympic Arch, the Medical Centre, kiosks, University of Calgary and Mount Royal College, and plans received by OCO'88 from other games, most notably the 1980 Lake Placid Olympic Winter Games. There are 125 plans and two posters in this sub series.

There are no restrictions on this material. However, because of the size and sometimes fragile quality of some documents, copying of material will be at the discretion of Archives staff.

File listings by sub series follow.

Sub series i: Canada Olympic Park

Map Folder 13

1. Canmore Nordic Centre (bound plans; with attached correspondence):
 - Permanent Building Interiors, Day Lodge, Ground Floor & Second Floor, [July 20, 1987]
 - Permanent Building Interiors, Day Lodge, Cross Country Team Room, Biathlon Team Room, [July 20, 1987]
 - Permanent Building Interiors, Day Lodge, Maintenance Building, Biathlon Building, [July 20, 1987]
 - Temporary Shelters, Interior Layout, [July 20, 1987] (4 pp.; different plans)
2. Canmore Nordic Centre, FMS Lavalin, Temporary Shelters, Interior Layout, [June 1987] (3 pp., different plans; with attached correspondence; all marked "Preliminary Drawing." Note: These plans were formerly in a set of bound plans for both Canmore Nordic Centre and Nakiska, with notes on the plans indicating that they were current as of 1987 June 1 and that further changes would be made to the drawings. As a result, some of these plans were made redundant because of updates as of 1987 July 20 described in #1 above. Therefore, the June versions of some of these plans, duplicated and updated in July, have been removed for disposal. Those that remain, described here, were not duplicated. The Nakiska plans were transferred into the "Nakiska" series and represent the first four plans described in Series I, Sub series ii, Map Folder 19)

Sub series xiii: Main Accreditation Centre and Calgary International Airport

Map Folder 1

1. Temporary Facilities for OCO'88 Main Accreditation Centre, by Domus Design Group Limited, Calgary (bound plans, with notations and signatures; includes attached memorandum of 1987 September 4):

- Demolition Plan, April 1987; issued August 1987
- Partition Plan, April 1987; issued August 1987
- Reflected Ceiling, Ground Floor, April 1987; issued August 1987
- Power & Comunication [sic] Requirements, A.4a, April 1987; issued August 1987
- Power & Comuncations [sic] Requirements, A.4b, April 1987; issued August 1987
- Furniture Plan, Ground Floor, April 1987; issued August 1987
- [no title, Drawing number A-6], n.d., issued August 1987
- Second Floor Plan, April [19]87; issued August 1987
- South Hanger Layout, April [19]87; issued August 1987
- Finish Plan, Aug[ust 19]87; issued August 1987
- Room Finish and Door Schedules, n.d., issued August [19]87
- Mechanical Floor Plan, M-1, August 12, 1987; issued August 1987
- Mechanical Floor Plan, M-2, August 12, 1987; issued August 1987
- Ground Floor Lighting Plan, E-1, April [19]87; issued August 1987
- Ground Floor Power Plan, E-2, April [19]87; issued August 1987
- Sportchek Facility, Lighting & Power Plan, April [19]87; issued August 1987
- Second Floor Lighting & Power Plan, April [19]87; issued August 1987

2. Temporary Facilities for OCO'88 Main Accreditation Centre, by Domus Design Group Limited, Calgary (bound plans, duplicates of the above but without notations and signatures or attached memorandum; includes one extra plan):

- Demolition Plan, April 1987; issued August 1987
- Partition Plan, April 1987; issued August 1987
- Reflected Ceiling, Ground Floor, April 1987; issued August 1987
- Power & Comunication [sic] Requirements, A.4a, April 1987; issued August 1987
- Power & Comuncations [sic] Requirements, A.4b, April 1987; issued August 1987
- Furniture Plan, Ground Floor, April 1987; issued August 1987
- [no title, Drawing number A-6], n.d., issued August 1987
- Second Floor Plan, April [19]87; issued August 1987
- South Hanger Layout, April [19]87; issued August 1987
- Finish Plan, Aug[ust 19]87; issued August 1987
- Room Finish and Door Schedules, n.d., issued August [19]87
- Mechanical Floor Plan, M-1, August 12, 1987; issued August 1987
- Mechanical Floor Plan, M-2, August 12, 1987; issued August 1987
- Ground Floor Power Plan, E-2A, April [19]87
- Ground Floor Lighting Plan, E-1, April [19]87; issued August 1987
- Ground Floor Power Plan, E-2, April [19]87; issued August 1987

II. OCO'88, Miscellaneous Oversize Artificial Series. -- 1983-1988. -- 37 posters, 11 plans and other material.

Archival Description: This is an artificial series describing miscellaneous oversize material which did not fit in with the plans and maps described in Series I.

Scope and Content: This series is made up of five sub series described below. These sub series are much smaller than those described in Series I and have not been separated by tabbed pages in the inventory.

Sub series i: Planning Schedules and Charts - This sub series consists of six plans (planning schedules or charts).

Sub series ii: Data/Results Networks - This sub series consists of five plans depicting systems networks.

Sub series iii: Aerial Photographs - This sub series is made up of three oversize photo negatives.

Sub series iv: Posters - There are 37 posters in this sub series, 16 from the XIV Olympic Winter Games in Sarajevo, Yugoslavia and the rest from Calgary Games. Two copies of each of the posters from the XV Olympic Winter Games have been kept

Sub series v: Miscellaneous - This sub series is made up of a number of miscellaneous oversize items which were not described elsewhere in this inventory. These have been stored separately on shelves and not in an oversize box or in map cabinets.

The other material consists of three photo negatives, two cultural historic items (mounted report and table set for nations' flags), plus a number of mounted colour palettes for the Olympic venues.

A file listing follows.

Sub series i: Planning Schedules and Charts

Map Folder 1

1. Closing Ceremonies, Time Frame Comparison Chart, September 15, 1987
2. Opening Ceremony, Time Frame Comparison Chart, n.d.
3. Olympic Village Calgary, Planning Schedule, February 23, 1987 (2pp.)
4. [Olympic] Games [Master] Plan [Schedule], Master Plan Schedule, March 3, 1983 (OL99S100010; with notations; larger than map folder; folded)
5. XV Olympic Winter Games Organizing Committee, Planning Schedule, June 19, 1987

Sub series ii: Data/Results Networks

Map Folder 1

1. OCONet, n.d. (mylar)
2. Typical Intra-Venue Communications Configuration, n.d. (mylar)
3. OCO Terminal Network, March 5, 1987 (FLOW23700; paper)
4. OCO System 3081 Model GX, March 4, 1987 (FLOW23500; paper)
5. OCO Data Centre Network, March 5, 1987 (FLOW23600; paper)
6. OCO'88 Base Data, June 27, 1987 (FLOW24401; paper)
7. Results Network, Canada Olympic Park Test Events, October 9, 1986 (FLOW21501; paper)
8. Results Network, Alpine Test Events, Dec. 21-23, 1986, December 9, 1986 (FLOW22300; paper)
