

**XV OLYMPIC WINTER GAMES  
INVENTORY TO THE  
RECORDS OF THE OPERATIONS GROUP  
PART II**

**XIII. Operations Group, General Manager Villages and Transportation, Bill Wilson. -- 1986-1988. -- .45 m of text.**

**Archival Description:** As the "Archival Description" in Series X indicates, Bill Wilson served in many capacities in his term with OCO'88: 1984 December to mid 1986 as Manager, Transportation; then to 1987 September as Manager, Media Villages, and 1987 September to the end of the Games, as General Manager of Villages and Transportation. As General Manager, he reported to the Vice President of Operations, Bruce Cleveley.

**Scope and Content:** These are the only records received by the Archives representing Bill Wilson's term as General Manager, Villages and Transportation. They are in alphabetical order. Other boxes received by the Archives which were labelled Villages and Transportation were actually the records of Denis Baudais, Manager Media Villages, and may be found in Series VII.

A file listing follows.

**File listing:**

Box 1

Accident Reporting and Loss/Damage Reports, 1987-1988

Accreditation, 1988.

Airport Operations, 1987-1988.

**XIV. Operations Group, Food Services Department, Manager John Scanlon.  
-- 1977-1988; (predominant 1982-1988). -- .81 m of text and 4 plans.**

**Archival Description:** The Food Services Department (also referred to as Food and Beverage Services) of the Operations Group was mandated to provide Athlete Feeding, Spectator Feeding, VIP Hospitality, Media Services and Team'88 Services. Novelty and souvenir sales at Olympic venues were also included within the scope of this Department.

Like many other functions carried out by OCO'88, Food Services went through many organizational changes while trying to fulfill its designated functions. Initially, the (Volunteer) Food Services Committee was established in 1982, and a Steering Committee of food service professionals handled these responsibilities at least up to 1986. This committee structure was venue oriented and was used for the Preview'88 test events in 1986 and 1987, and eventually served as the basis of the food services function under the Venue Management structure.

The food services function was originally part of the Services Division of the Operations Group under Vice President John Pickett (see Series I), and its first appearance in an organizational chart was from 1986 February. By July of that year, Food Services had been combined with the accommodation function under Manager Ron Sandrin-Litt, and by September, the Department was referred to as Hotel/Motel and Food. Manager Sandrin-Litt reported to the General Manager of the Accommodation Division, Jean Filion.

By 1986 December, the responsibilities for Accommodation and Food Services were split and Lloyd Wheating became Manager of Food Services, although the reporting structure--to the General Manager of the Accommodation Division--remained unchanged. This organizational structure remained in place until at least 1987 April after which OCO'88 contracted with ARA Services of Delaware and Maryland to be the Official Supplier of Food Services Manager. Although the contract between OCO'88 and ARA Services was not signed until 1988 January, a number of ARA's staff were integrated into OCO'88 well before that time. By 1987 September, John Scanlon, the Vice President of Special Projects for ARA Services, became Manager of OCO's Food Services Department and Lloyd Wheating was reassigned to the position of Supervisor under Scanlon. Scanlon reported to Jean Filion, by now the General Manager of the Operations Services Division. This organizational structure remained in place until the end of the Games.

**Scope and Content:** Records of the Food Services Committee may be found in the Marketing Group records, Series I. Other records of the Food Services Department can be located in the records of the Executive Group, Series VII, XI and XIV; in the records of the Communications Group, Series II; in the records of the Marketing Group,

Series X; and in the records of the Operations Group, Series II, IV, and V. The Marketing Group also includes records on the Suppliers Program in Series III, V, and VIII.

Records in this series are from Manager John Scanlon and, therefore, represent the administration of the Food Services Department after ARA became associated with OCO'88. These records date from 1987, several months before the agreement between OCO'88 and ARA Services was completed. Also included with Scanlon's records were a few binders, mainly regarding agreements, from the office of John Mackasey, Supervisor, Food Services. It is unknown how these records became included with Scanlon's records. Mackasey's records may be found in Box 7.

A file listing follows.

**File listing:**

Box 1

Maxwell House Coffee/General Foods, Cups, Coffee, Urns, 1987-1988.

Accreditation, 1987-1988.

**XV. Operations Group, Food Services Department, Day Files -- 1987-1988. --  
.19 m of text.**

**Archival Description:** OCO'88 entered into an agreement with ARA Services (of Baltimore) to be the Official Supplier of Food Services Management for the XV Olympic Winter Games. While this arrangement was made formal only in 1988 January, ARA's association with OCO'88 began sometime in the latter part of 1987 when a number of ARA's staff joined the Food Services Department of OCO'88. Among these were William C. Grant, Associate Director, Facilities Planning, ARA Services; Paul Cerullo, Director, Operations Development, ARA Services; Kate Mickey, Director, Special Catering, Leisure Services Group, ARA Services (also referred to as Director, Special Projects, Fine Dining Division, ARA Services); John Moran; Ignatius Brett; Roy Whitelock; Michael Stern; and John Scanlon (who became Manager, Food Services; see previous series). Their work is reflected in these Day Files.

The job titles of ARA Services personnel within OCO'88 organizational structure varied from document to document. Often their correspondence listed their job title as merely "Food Services;" at other times, the title of "Consultant" was used. In organizational charts their positions were often referred to as Supervisors or Coordinators. Michael Stern was also referred to as "Controller."

Organizational charts from 1987 and 1988 in the Appendices indicate the various responsibilities of the Food Services personnel.

**Scope and Content:** Of these days files, only those of Loyd Wheating (Manager and later Supervisor, Food Services) and John Mackasey (Supervisor, Food Services) represent local OCO'88 staff. All others are from ARA Services/OCO'88 personnel.

A file listing follows.

**File listing:**

Box 1

Loyd Wheating, 1987-1988. (Includes minutes of Alpine Accommodation meeting)

John Mackasey Day File, 1987-1988.

and Ignatius Brett)

Roy Whitelock Day File, 1987-1988.

Michael Stern Day File, 1987-1988. (2 folders)

Box 2

John Scanlon Day File, 1987-1988. (2 folders)

Katie Mickey Day File, 1987-1988.

**XVI. Operations Group, Engineering Department. -- 1974-1988; (predominant 1982-1988). -- 13.75 m of text and other material.**

**Archival Description:** Although the records in this series were all designated as originating in the “Engineering” Department of OCO’88, they are actually from a more diverse range of records creators. The two main records creators of these documents were Ron Collie, who was Vice President of Facilities and Technical Services from 1982 April until his resignation in 1985 November/December, and Alex Cummings, General Manager of Venues from 1985 December to the end of the Games. Occasionally, the names of other records creators also appear in these files, including David Price, originally hired by OCO’88 as a Supervisor in Facilities and Technical Services (ca. 1984 December) and later appointed as Manager of Engineering (from 1986 February); Ralph Wesche who was a Supervisor of Engineering from as early as 1986 July, and Case DeMooy who appears in OCO’88 organizational charts in 1986 December as Manager of Construction. (See Series XVII.)

The mandate of the Engineering Department was “to ensure that all competitive and ancillary facilities were in a fully operational state prior to the start of the Games” (OCO’88, Communications Group, II, Box 14). The major functions were those associated with facilities (or engineering) and with venues. These functions came to be part of the Operations Groups responsibilities through a variety of organizational changes. Initially, in a proposed organizational chart from 1982 January, “Sport Venues” was listed as a responsibility of the Games Operations Olympic Council, under the proposed Vice Presidency of John Pickett. “Venues” was to be a responsibility in the Technical Services Olympic Council under Vice President Pat Mitchell. At this stage, there was no distinctive “Engineering” Department. By 1983 August, both Facilities and Technical Services (under Vice President Ron Collie) and Games Operations (under Vice President John Pickett) were responsibilities in the Olympic Services Group. By 1984 March, with further organizational changes, both the Senior Vice President of Operations, Pat Mitchell, and the Vice President of Facilities and Technical Services, Ron Collie, reported directly to the President of OCO’88, Bill Pratt. As well, by 1984 “Engineering” begins to appear as a distinct function in some organizational charts, but not with any consistency.

By 1985 June, Bruce Cleveley had replaced Pat Mitchell as Senior Vice President of Operations, and he reported directly to President Pratt. Operations was still an organizational unit separate from Facilities. By late 1985, Engineering appears in the organizational charts as a distinct Department in Facilities and Technical Services, and the Supervisor, David Price, reported to Vice President Ron Collie.

However, with the resignation of Ron Collie as Vice President of Facilities and Technical Services in 1985 November/December, the engineering function of Facilities and Technical Services was transferred to the Operations Group. Alex Cummings was

appointed to replace Collie, but in the new position of General Manager, Venues. He reported to Bruce Cleveley, the Vice President of Operations. The “engineering” function was now part of the Operations Group, and under the general supervision of General Manager Cummings. David Price remained as Manager, Engineering.

By 1987 January, the official responsibilities of the General Manager of Venues were listed as being Facilities, Venue Engineering and Venue Planning. As well, the General Manager, Venues was to act in liaison with the Venue Chairmen for planning and policy decisions. Venue Engineering, under Manager Price, was to provide administrative and technical support to ensure that the Facilities programs at all venues were managed for scheduling, efficient execution and technical acceptability.

Despite the prominence of the Engineering function as evidenced by this series of records, the organizational chart from 1987 September printed in the Official Report does not include an Engineering Department. Only the administrative unit headed by the General Manager of Construction is given there. However, a summary of the Engineering Department may be found in the Official Report (p. 359) and a more extensive “Final Report” of the Engineering Department is located in the Communications Group records, Series II, Box 14.

**Scope and Content:** This very large series of records is one in which OCO staff attempted to develop and maintain a filing classification system. The extent of OCO’s commitment to this alpha-numeric system is doubtful as the system was not maintained with consistency. Numerous files in this series were never assigned a classification number; no “key” to the system was ever located by Archives staff during arrangement and description; and in many instances, the file classification system was not maintained when the files were packed into moving boxes for storage and transfer to Archives.

During arrangement and description, an attempt was made to re-establish the filing order according to this file classification system. Files without classification numbers follow those with numbers and are generally arranged according to subject.

A very large number of oversize plans and maps was also included in this series. These have been removed from their original files and are stored either in oversize Hollinger boxes or in map folders in Map Cabinets. Notes occur in the file listing when this has occurred and a complete listing of all oversize material concludes the file listing.

The other material consists of approximately 980 plans, 240 photo prints plus one radar photo print, 35 maps, 34 photo negatives, eight oversize schedules, five colour renderings, several fabric samples, samples of wind break fencing, and 81 pages of oversize text.

A file listing follows.

**File listing:**

**XVII. Operations Group, Construction Department. -- 1986-1988. -- .25 m of text and 14 plans.**

**Archival Description:** According to the Official Report of OCO'88, the Construction Department came into being as a result of the Preview'88 test events during which it was concluded that "more intensive field supervision by experienced construction field supervisors would be required to install facilities for the Olympic Winter Games" (p. 359).

Case DeMooy, the Manager of Construction, was appointed in 1986 December and it was at that time that the Construction Department first appears on OCO'88 organizational charts. The Manager, Construction reported to the General Manager of Venues, Alex Cummings.

As stated In the Construction Department "Final Report" (Communications Group, II, Box 14), the mandate of the Department was "to develop and implement a plan of action to execute the installation and dismantling for all temporary facilities required to stage the Games." This mandate is expanded upon in the Official Report (p. 359), but essentially the Department was responsible for overseeing construction tenders and contracts. More detail is also given in the Construction Department "Final Report."

**Scope and Content:** Only one moving box of Construction Department records was transferred to the Archives. All others remained in the custody of the Calgary Olympic Development Association at the Kestrel records centre. The records creator for the records in this series was Con Amendt, Consultant, Engineering.
