

Where does my residential property tax dollar go?

Your City tax dollars fund services Calgarians value and use every day. City tax-supported services cost **\$5.88 per day** for the typical Calgary household*

*Typical single residential home assessed at \$445,000 in 2021. Actual values will vary based on your property's assessed value, visit calgary.ca/taxcalculator

Supporting Calgarians

COVID-19 has impacted us all. The City has worked hard to reduce expenses while providing the critical services you need. **We are proud to be the only major city in Canada to cut taxes during this challenging year.**

\$90 million in reductions were found from the previously approved 2021 budget. An additional **\$51 million** from the tax-supported budget is targeted for the start of 2022.

77% of homes will see a **reduction** or **no increase** in their 2021 property tax bill. Calculate your specific tax change at calgary.ca/taxcalculator.

Recognizing the ongoing financial impacts Calgarians are facing due to COVID-19, Council has approved the following tax relief measures:

- The July 1, 2021 late payment penalty has been reduced from 7% to 3.5%.
- The October 1, 2021, 7% late payment penalty and January, February and March 2022 1% late payment penalties have been waived.

Investing in Calgary's relaunch

We allocated provincial and federal COVID-19 recovery funding and City savings to support Calgarians and our local economy. Investments in COVID mass vaccination centres, affordable housing, and programs to support Calgarians' physical and mental health will prepare us for Calgary's relaunch.
