CALGARY
POLICE
SERVICE

RESPECT • HONESTY • COMPASSION • COURAGE • FAIRNESS • ACCOUNTABILITY • INTEGRITY

Executive Summary

The full picture of the socio-economic impacts brought on by the public health state of emergency under Covid 19 is not yet fully understood. However, the immediate and sudden changes to the social dynamic of society, including office closures, shutting of businesses, closures of public spaces, restrictions on gatherings, and sweeping travel restrictions have had a significant short-term impact on both crime and disorder. We know that with the link between crime and the economy, particularly unemployment, the full impact of the pandemic on crime and calls for service is yet to be realized.

The Calgary Police Service has been tracking the impact of the Covid-19 state of public health emergency on crime and disorder patterns in the city. Since the state of emergency was declared on March 15th 2020, general call and crime volumes have shown noteworthy reductions. Restrictions on gatherings, closures of public spaces and the large portion of the population being home-bound have increased guardianship in residential areas and reduced the opportunity for certain crimes, such as robberies, break and enters and thefts or and from vehicles. Overall calls for service also saw slight reductions; however, there was an increase in citizen's reports of disorderly behaviours and non-criminal domestic conflict. With the reduction in call volume, officers had more time to focus on crime issues and trends, resulting in higher clearance rates than is typical for this time of year.

Violent Crime

At the end of the first half of 2020 violent crime is down 17% from last year by this time and is 12% below the five-year average for this period. The months of March through June saw volumes well below those recorded last year. As the economy reopened in June violence is showing a slow return to average levels, although it remains well below volumes recorded last year.

There were 16 homicides in the first half of 2020, a 45.5% increase from the average for this period. 2 of the 16 homicides were domestic motivated. Gang-related homicides have emerged as accounting for a higher proportion of homicides than in previous years. Sexual assaults are at their lowest level in four years. A drop in the number of reported Level 1 (common) sexual assaults drove the overall reduction and account for just over 3 in 5 of all sexual assaults. The 'Other' sex offences increased during the last quarter when compared to 2nd Quarter 2019; although a numerically small increase, victims reporting voyeurism tripled (21 victim reports in 2020, compared to 8 in 2019).

Assaults account for roughly 70% of all violent crimes, with Level 1 (common) assaults making up the majority all assaults. When compared to last year, common assaults are down, influenced heavily by a 28% drop during the 2nd Quarter. More serious assaults, those with a weapon or causing bodily harm, are also trending down this year compared to previous years.

Robberies are crimes significantly impacted by the combination of closures of businesses and limited public movement. There was a 50% reduction in the number of total number of robberies so far in 2020; commercial robberies dropped by 54%, and person robberies by 47% from 2019 levels.

Domestic Violence and Domestic Conflict *

Fewer victims reported Domestic Violence than in 2019. Since March, reports of domestic violence have been below the five-year average, driven largely by a reduction in Level 1 (common) assaults. There were, however, higher numbers of victims of more serious assaults and sexual violence. Domestic assaults involving a weapon or causing bodily harm increased. Domestic-related sex offences are down from the 2nd Quarter of 2019 but are up nearly 10% from the 5-year average for the Quarter.

Executive Summary

Domestic Violence and Domestic Conflict* (con't)

Calls made to police for assistance or police presence for escalated domestic disputes that have not reached a criminal threshold increased sharply during the first three months of the state of emergency. These types of call have started to track down since the restrictions began to lift.

Property Crime

Property crime levels dropped steeply during the 2nd Quarter under the state of public health emergency. Reductions were recorded in all categories, resulting in a 29% reduction for the same quarter last year and a 22% decrease from the benchmark five-year average. Enhanced guardianship of property, combined with a reduction of vehicles and property in public spaces are primary factors in these reductions. A return to more normal movement patterns, combined with economic pressures and high unemployment are expected to bring property crime volumes back up to pre-Covid levels.

When compared to the first half of 2019, break and enters are down 16%, driven down by a 29% reduction during the 2nd Quarter; during the last quarter dwelling break and enters registered a 44.5% reduction and commercial break and enters dropped by one-third.

Thefts of and from vehicles make up more than half of all property crime. Vehicle thefts had been trending on a notable upward trajectory by the end of 2019. During the 2nd Quarter vehicle thefts dropped 30% from last year during the same quarter, resulting in a year-to-date decrease of 13.5% when compared to 2019.

Thefts from vehicles had previously been trending upwards throughout 2019; during the 2nd Quarter they dropped nearly 30% from levels recorded for the same quarter last year.

The 2nd Quarter resulted in a 65% reduction in shoplifting as a large proportion of shops remained closed through the quarter (comparison to Q2 2019).

Disorder

In addition to monitoring crime levels, the Calgary Police Service uses a range of incident types from publicly-generated calls for service to monitor levels of disorderly behaviour. These calls tend to be seasonal and increases during the warmer months can be expected. The incident types selected for this disorder index are those which can have a negative impact on citizens' perceptions of safety, particularly in public places. Calls about suspicious persons, vehicles, unwanted guests and disturbances make up the largest portion of complaints received about disorderly behaviours.

Elevated levels of disorder were noted during the 1st Quarter of this year, and a noteworthy progression through the 2nd Quarter. Increases in reports of suspicious persons, unwanted guests, noise complaints, disputes between neighbors and landlord/tenants, party complaints and reports of possible gunshots. Citizens with higher vigilance and potentially less tolerance for disorder, coupled with the shift to increased occupancy of residential areas, and redistributions of vulnerable populations under Covid –19 are contributors to additional reporting of disorder.

*Note: Domestic violence is included in total violent crime in the city but is reported quarterly as a subset of all violent crime. As with all violent crime, domestic violence is represented at the victim level by the most serious offence against each victim in an incident.

REPORT NOTES

Most of the statistical data in this report is derived from the Calgary Police Service records management system (SENTRY) and compiled by the Centralized Analysis Unit. Disorder data is derived from the Computer aided Dispatch (CAD) system.

Reporting is based on the most serious offence in the incident. Please note that offences are assigned to the month in which the offence was reported, which is not necessarily the month the offence occurred. The reported date is the first point in time at which the police were notified of the offence and reporting lag may vary due to circumstances (these are typically property crimes where the victim did not report the offence until a later date, or was unaware of the loss until a later date, or late-reported sexual assaults). Also note that “attempted” offences are included in these totals. Violent crime, excluding robbery, is counted by the number of victims, using the most serious offence against the victim. Robbery, and all other crime, is counted by incident using the most serious offence in the incident. Of note, cases are often cleared months and sometimes years later. Consequently, clearance rates for previous years may appear to be much higher than those of the present year. Cases “cleared by charge” and those “cleared otherwise” are included in these clearance rate totals.

Please note that youth-related and Call for Service statistics are currently unavailable due to a transition in CPS reporting systems.

¹ Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. ² Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. ³ Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. ⁴ Missing persons are counted by the number of missing individuals.

¹Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. ²The range of average is calculated as 1 standard deviation above and 1 below the calculated average for the previous five year period.

Dispatched, advised and callback calls are included.

¹Calls for service included in the "mental health concern" component of social disorder are only those calls from the public which are specifically coded as a mental health concern or mental health warrant. It is important to recognize that any call police are asked to attend may involve some element of mental health concern, even though they are not coded as such. This applies particularly to calls about suicide, missing persons or check on welfare, which are not included in this data as they are not considered social disorder.

² The majority of Property Damage calls result in *Criminal Code* reports, which are counted under 'Other Property Crimes'. ³The range of average is calculated as 1 standard deviation above and 1 below the calculated average for the previous five-year period. *2019 data excludes December 31st due to technical issues.

¹Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. ²Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. ³Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. ⁴A change made to the way in which bail violations and failures to appear/attend violations in 2017 makes the numbers for these categories non-comparable across the five-year period. ⁵Missing persons are counted by the number of missing individuals.
