

Southland Leisure Centre

Solar Photovoltaic (PV) System

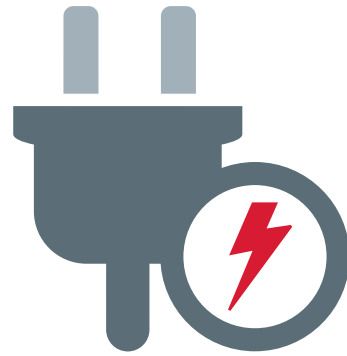

Southland Leisure Centre is now home of The City's largest solar photovoltaic (PV) project to date.

600
solar panels

Equivalent to offsetting the electricity use for up to
**24 average
Calgary homes**

153 kW system
Expected electricity
produced per year:
**up to
184,000 kWh**

The system will produce
electricity for over

25
years 

This project was paid for by The City's Sustainable Buildings Partnership Program (SBPP), which is funded through the Municipal Sustainability Initiative (MSI).
