Make your own virus-fighting Ready Squad soap

Hand washing is one of the key ways that we can prevent the spread of COVID-19. With an adult supervising, try out this fun activity for making your very own, virus-fighting superpowered soap!

Materials needed

- Boiling water
- Soap (liquid soap or bar soap)
- Gelatin or agar (vegan option)
- Muffin pan
- Muffin pan liners
- Bowl
- Whisk
- Small toy or sticker
- Optional – Other decorations such as food colouring, glitter, etc.

Step-by-step instructions

1. Line your muffin pan with liners.
2. Put a sticker or a toy in each of the cups.
3. Dissolve one packet or two teaspoons of gelatin or agar in 100 ml of boiling water.
4. Stir until clear.
5. Add $\frac{1}{4}$ cup of liquid soap or grated bar soap into the gelatin mixture.
6. Add food colouring or glitter. Stir until dissolved.
7. When mixed thoroughly pour the mixture into the muffin liners over the sticker or toy. Fill almost to the top of the muffin liner.
8. Put in the fridge for at least three hours or overnight.
9. Soap will come out of the muffin liner once set.
10. Place the soap in a small container or a baggie so that it can be placed in a backpack or pocket.
11. Enjoy washing your hands!
