<b>DIMENSION FOUR:</b> ↑ CHILD & YOUTH POSITIVE DEVELOPMENT	23	3,927	<b>SURVEYS THAT CANNOT SHOW COLLECTIVE IMPACT</b> (ONLY 1 PROGRAM <u>OR</u> RESULTS SUPPRESSED DUE TO COMBINED TOTAL OF LESS THAN 25 MATCHING PRE/POST TEST PAIRS)	14	21, 26, 27, 28, 31, 35, 37, 40, 42, 45, 47, 52, 53, 57
<b>DIMENSION FIVE:</b> ↑ INDIGENOUS HEALING AND WELLBEING	11	1,052			
<b>TOTAL</b>	<b>51</b>	<b>24,911</b>	<b>TOTAL</b> (NUMBER OF SURVEYS <u>ANALYZED</u> IS GREATER THAN THE NUMBER OF SURVEYS <u>AVAILABLE</u> BECAUSE ONE SURVEY IS ANALYZED IN TWO PARTS AND IS COUNTED TWICE, ONE FOR EACH REPORT CREATED)	<b>51</b>	<b>n/a</b>

**METHODOLOGY FOR OUTCOME ANALYSIS**

As of June 30, 2022, 51 Indicator Surveys were available and 133 FCSS-funded programs used them to report data to the FCSS Social Inclusion Indicators database (FSII). Many programs use more than one survey.

Collective impact analysis includes all FCSS-funded programs offered by community organizations. This excludes FCSS-funded children and youth programs offered by Calgary Neighbourhoods.

This report includes data for active participants, those with a test date between July 1, 2021 and June 30, 2022. This includes cases when the pre-test date was prior to July 1, 2021 but the matched post-test date was after July 1, 2021.

A total of **22,397 individual participants** were served in programs using FSII from July 1, 2021 through June 30, 2022 and were counted in the FSII. Some registered for more than one program or took the same program more than once at different times during the year.

There were **24,822 intake surveys** for participants. Associated with these were **34,950 pre-tests**. There are more pre-tests than intake surveys because of programs that use more than one survey. Of the pre-tests, **24,911 (71.3%)** had **matching post-tests**. There was **no matching post-test** for **10,039 cases (28.7%)**, meaning change between pre-test and post-test could not be calculated. Lack of matched pairs might happen because the participant hasn't been in the program long enough or dropped out before the post-test was given.

**SUMMARY OF INTAKE/REGISTRATION DATA**

NUMBER OF TIMES DISCRETE PARTICIPANTS REGISTERED FOR AN FCSS-FUNDED PROGRAM – INTAKE DATA (SOME >1 TIME IN >1 PROGRAM)	REGISTRATION IN ANY PROGRAM 1 TIME ONLY	REGISTRATION IN ANY PROGRAM 2 TIMES	REGISTRATION IN ANY PROGRAM 3 TIMES	REGISTRATION IN ANY PROGRAM 4 TIMES	REGISTRATION IN ANY PROGRAM 5+ TIMES
INTAKES FOR PARTICIPANTS – JULY 1, 2021 - JUNE 30, 2022	20,579	3,634	503	101	5
PER CENT	82.9%	14.6%	2%	0.4%	Less than 0.1%

Change between pre-test and post-test was examined for all surveys with 25 or more matching pre/post test responses. Questions that could be analyzed for statistically significant change were assessed using the Wilcoxon Signed Rank Test. Statistical significance is reported using p-values.

**STATISTICALLY SIGNIFICANT CHANGE AND P-VALUES**

In the following tables, if the p-value is ≤ 0.05, the change between the pre-test and post-test is statistically significant and unlikely to have occurred by chance. Significant change can be positive or negative, as shown (+ or -).

If the p-value is >0.05, the change between the pre-test and post-test is not statistically significant and suggests that the outcome has not improved between the pre-test and post-test.

Overall scores are presented in this summary report for each survey across the four Dimensions. Detailed results for each question on every survey with 25 or more matched pre/post test responses are provided in the collective impact reports prepared for each survey.

REGISTRATION IN ANY PROGRAM 1 TIME ONLY	MULTIPLE REGISTRATIONS	TOTAL REGISTRATIONS
20,579	4,243	<b>24,822</b>
