**Re: Calgary Parks Pathways Closures and Detours  
2020 Closure and Detour Manual & ePermit Process Updates**

---

To whom it may concern,

Recently the Parks Pathways & Trails group has changed how contractors and other external groups are accessing pathways throughout the city to streamline our intake and processing of pathway closures and detours. This change was a result of a Council-approved resolution in fall 2018 and a subsequent Bylaw in March 2019, [11M2019 \("Bylaw to Regulate The Use of Parks & Pathways"\)](#). Section 22 stipulates that "any work taking place within 5 metres of the edge of a pathway must have a permit." This can be related to work commencing in access/proximity or requiring closure of a City pathways involving underground utility work, construction, or any event that is impacting pathway access; this does not include routine maintenance for internal crews such as tree watering or garbage collection.

The 2020 Pathway Closure and Detour Manual is available and has been updated to the following link for internal and external access and distribution for any contractor or user group wishing to close a pathway. It explains the requirements for permitting and closures to be approved and the associated signage/advance notice requirements. Please see the attached document/link for a full explanation of the methodology: [calgary.ca/PathwayClosureDetourManual](http://calgary.ca/PathwayClosureDetourManual)

For any contractors that are doing work that falls into the two previously mentioned work types, the permits can be applied for via the [myID web portal](#). Once inside, you can Open a service from the two existing options. Once you have selected to open a service, you will have access to a number of permit types under the Transportation banner. Navigating to the Roads e-Permits will bring you to a e-Permits page, and within there you can select a Pathway Closure & Detour permit. The images below will give you a quick summary in image form of how to apply for the permit. The contractor will need to supply contact information as well as information regarding the nature of their work. The permits are reviewed by the Pathway & Trail Technicians and are managed within the e-Permit environment.

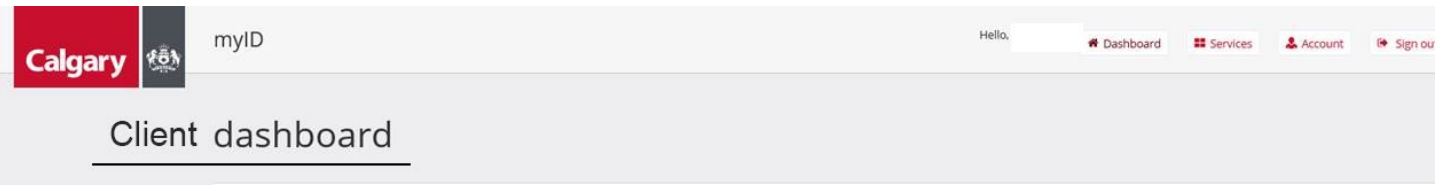

If you have any questions please don't hesitate to contact [pathways@calgary.ca](mailto:pathways@calgary.ca), thanks for your co-operation.

Best,

Calgary Parks, Pathways and Trails

Parks Pathways Permit

My Permits and Applications

You must apply for this permit prior to access of any Calgary Parks' pathways & trails that may involve use of pathways for vehicular access, construction or maintenance activities on or within 5m of a pathway. If the permit request involves a pathway closure, a closure and detour map and sign placement strategy will be provided by The City of Calgary Parks. Please review the [Pathway Closure & Detour Manual](#) prior to application of this permit to ensure you understand the requirements.

Your application must include:

- Contact information
- Project address
- The project Address
- A description of the work being performed.

NOTE: Please allow a minimum of 2 weeks for the permit request to be processed; failure to request a permit prior to the aforementioned work starting may delay permit release. Permits are governed by Bylaw [11M2019](#), section 22. This permit does not include sidewalk access requests.
