

Stormwater system maintenance

September 17, 2026

What's happening

The City of Calgary is conducting maintenance to the stormwater system in your area as a result of the landfill fire at ECCO Recycling & Energy Corporation.

Project timeline

Maintenance work began on September 17, 2026, and will continue until the fire has ceased or impacts to the stormwater system have been otherwise mitigated.

Project details

To divert water from the stormwater system, City of Calgary crews are pumping runoff from the landfill into the wastewater system. This ensures this water is properly treated at a wastewater treatment plant before returning it to the river.

Construction impacts

- Increased noise from pumps and generators.
- Increased construction traffic in the area.
- Hours of operation will vary pending water flow.
