

# 1 Vision

Calgary's Municipal Development Plan is a long-term vision for how our city grows and how people will live and travel in the future.

# 2 The Guidebook for Great Communities

The Guidebook provides the foundation on which we'll plan and use policy to evolve and grow our communities and implement our vision.

# 3 We get there with you!

Local Area Plans, with the Guidebook, allow us to work with residents and stakeholders to plan for the evolution of communities, while respecting their unique identity and sense of place.

# 4 Great communities for everyone

The result is communities that meet people's needs. They are places that people love and want to live in now and for generations to come.
