

# Lakeview Sanitary Lift Station replacement

April 2021

## Upcoming work in your community

We are replacing a section of pipe that connects the Lakeview Sanitary Lift Station to the existing sanitary network.

Work is expected to begin April 19, 2021 and take approximately one week to complete.

## Construction impacts

- We will be closing a section of northbound Crowchild Trail S.W., south of 66 Avenue S.W. (map on page two).
- Two-way traffic will be maintained in the southbound lanes.
- A detour will be in place for the section of Glenmore Pathway adjacent to construction.
- Signage will be displayed for the pathway detours five days prior to work starting.
- A temporary backup sanitary bypass system will be installed at the site of the existing lift station. This will ensure sanitary service is maintained during construction. A temporary sanitary pipe will run along the east side of Crowchild Trail S.W. from the lift station to 66 Avenue S.W.
- A crew member will be on site monitoring the temporary sanitary bypass system 24/7 to make sure it's not damaged.

- There may be increased noise if it becomes necessary to activate the backup bypass system.

## Background

When water runs down a sink, drain or toilet, it becomes wastewater. Calgary has a system just for wastewater, moving it by gravity and pumps to one of three wastewater treatment plants. Portions of the communities of Lakeview and North Glenmore Park rely on the Lakeview Sanitary Lift Station to transfer wastewater from its catchment area to the sewer trunk.

The existing lift station no longer meets current operational and safety guidelines. We are constructing a new lift station and piping to ensure we continue to provide a high-level of sanitary service to your community.

The new lift station will be located in the northeast corner of North Glenmore Park, alongside the North Glenmore Park Road.

Construction of the new lift station started in December 2020 and will take 12-18 months to complete.

## Work during the COVID-19 pandemic

The City of Calgary continues to treat, test and deliver high-quality water to Calgarians during the COVID-19 pandemic. While we prioritize the delivery of essential

services, our capital construction programs are moving forward where possible. These projects are critical to supporting current and future development. We are working closely with our partners and will continue to monitor the current situation, making adjustments as needed.

Our most important priority remains the health, safety and well-being of our staff and contractors. We continue to put in place new measures and protocols to ensure public health is protected.
