Attention: Monique Nessel

Dear Monique:

RE: SMART CITIES

ENMAX is pleased to participate as a strategic partner with The City of Calgary on the Smart Cities Initiative. Energy infrastructure and innovative energy solutions are critical success factors for Smart Cities and will benefit the community. ENMAX will play a pivotal role. As an integrated energy organization, a large component of our customer base is located in Calgary and our online 'MyenergyIQ' service provides personalized customer energy usage information along with creative suggestions for reducing energy use. Providing easy access to good information empowers our customers to make smart energy choices.

ENMAX is actively evaluating new and innovative technologies that could benefit Calgarians and we are working with several third parties to evaluate commercial viability.

Sincerely,

A handwritten signature in black ink that reads "Raymond McKay". The signature is fluid and cursive, with the first name being more prominent.

Raymond McKay
Vice President, Energy Solutions
