

Green Line Ground Investigations

Notice Date: April 14, 2025

Beginning in mid-April, a series of borehole tests will take place to analyze ground conditions along the Green Line alignment. Work will occur on City-owned property and no significant impacts are expected on roadways. Each test will take one to two days. If more direct impacts are expected to residents or businesses, Green Line will coordinate with those affected. Following this series of borehole tests, additional locations along the alignment will be investigated in July and August.

What	Borehole investigations
Where	Locations along the Green Line alignment
When	114 Ave/Barlow Tr SE – April to June Ogden – Early May Highfield/Blackfoot Trail – Mid to late May Ramsay – Late April and June

What is the work? - Green Line Ground Investigations

Green Line is testing ground conditions through a series of geotechnical and environmental borehole drilling exercises. These tests involve drilling boreholes into the ground, collecting samples, then analyzing the material. These tests provide critical information about the ground and what to expect during construction. These tests are the final series of tests to support detailed design.

About Green Line LRT

The Green Line is Calgary's next light rail transit (LRT) line. With over \$6 billion in commitments from the Government of Canada, Government of Alberta and City of Calgary, it is the largest infrastructure investment in our city's history.

Accessibility is a priority for Green Line. If you have concerns with accessing information or navigating around construction, please contact greenline@calgary.ca
