Installation almost complete as we prepare to connect the new pipe to the existing system

Construction on the Bearspaw South Feeder Main replacement project is nearing completion, with approximately 95 per cent of the new feeder main now installed.

Stage 4 water restrictions start on Wednesday, November 4 so that we can connect the new pipe into the existing water system. All Calgarians are asked to help conserve water for approximately four weeks while this work is underway.

The top three ways to save water indoors are:

- Only run your washing machine and dishwasher with full loads.
- Only flush when needed.
- Take shorter showers, aiming for 3 minutes.

For more information on the upcoming water restrictions visit calgary.ca/savewater.

As the project enters the final stages, here's what we're doing:

Installation nearing completion on 34 Avenue N.W.

More than 90 per cent of the new feeder main has now been installed between 89 and 73 Streets N.W. Landscaping restoration will continue through the fall, weather permitting. Any remaining work will be completed in spring 2027.

Connecting the feeder main

Starting November 4, crews will begin preparing to connect, or "tie-in" the pipe by shutting down and draining the existing Bearspaw South Feeder Main. Tie-in construction will take place in November and December at three locations:

- 33 and 34 Avenues at 83 Street N.W.
- 33 Avenue and 89 Street N.W.
- Shaganappi Pump Station, near Edworthy Park

This work will result in significant traffic impacts, including intersection and lane closures, detours, and sidewalk and bicycle lane closures. Construction hours will vary by location, with some work requiring 24-hour construction.

Please view the [construction notice](#) for more details.

New valve and pipes ready to be installed at the Shaganappi Pump Station.

Parkdale Boulevard feeder main repairs

While the feeder main is shut down this November, we're taking the opportunity to repair a smaller section of the feeder main along Parkdale Blvd N.W. **Starting October 29**, repairs will begin on six sections of the pipe. Lane closures and traffic detours will be in place along Parkdale Blvd N.W., and river pathway detours will be required in the area. Be prepared for traffic delays on Parkdale Blvd and consider planning an alternate route for your commute. Work on Parkdale Blvd is expected to be completed in early December.

Happy Halloween!

We recognize that Halloween will look a little different this year along 34 Avenue N.W. due to road closures and construction, and some residents may not be able to welcome trick-or-treaters as they normally would.

To help keep the community safe on Halloween night, crews will install additional temporary lighting in areas impacted by construction to improve visibility. The lights will be in place from 6 to 11 p.m. on October 31 and removed the following day. Crews will also finish work early on October 31, before peak trick-or-treating hours.

If you'd like to get into the spooky spirit, Mainstreet Bowness will be hosting [Trick-or-Treat on Mainstreet](#) on Saturday, October 31 from 1:00 p.m. - 3:30 p.m. with trick-or-treating, pet paw-rade, scarecrow competition, live music, and giveaways.

You can also visit the Bearspaw South Feeder Main team at the Community Resource Centre to get **free slap-on reflective bracelets** to help keep your little ghosts and ghouls visible in the dark.

Have fun and be safe!
