

Bearspaw South Feeder Main Stage B tie-in construction

April 29, 2026

The City is expediting the construction of a replacement for the Bearspaw South Feeder Main (BSFM) due to the critical condition of the current pipe. The replacement project will add a parallel steel pipe to take over service from the current line and is expected to be completed in December 2026.

Stage B construction for the BSFM replacement pipe on 34 Avenue N.W. is scheduled to begin the week of May 11, 2026. Work will begin with tie-in construction required to connect the replacement pipe to the existing water system in two locations.

Where we are working

- **Beginning May 11:** 77 Street N.W. between 33 and 34 Avenues N.W.
- **Beginning May 25:** 83 Street N.W. between 33 and 34 Avenues N.W.

Construction details

Tie-in construction is required to connect the new feeder main pipe to the existing drinking water system. This work will be completed using an open-cut approach.

Open-cut construction involves:

- Excavating a trench along the public right-of-way
- Installing the new pipe directly in the open trench
- Backfilling the trench and restoring the surface

Construction Impacts

- Crews will be working Monday to Saturday, 6:30 a.m. – 9 p.m. and Sunday as required. *These hours are subject to change as needed to meet the project schedule.*
- Construction vehicles around work areas.
- Traffic impacts and detours.
- Temporary street parking impacts.
- Driveway access may be impacted for some residents. City representatives will be reaching out to impacted property owners directly.
- Fenced areas for equipment and supplies.
- Noise, dust and vibrations.
- There are NO planned water, gas, or electric outages, but temporary shutoffs may be required. There will be no impact to internet providers in the area.
