

Hull Services Concept Campus Plan

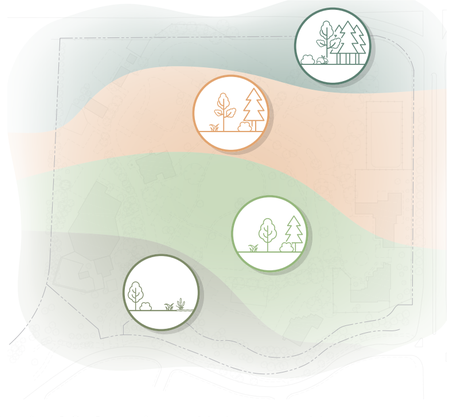

Healing Spaces: A variety of indoor and outdoor scales and settings for gathering areas in line with trauma informed campus design principles.

The Heart: Campus central gathering area and focal point that represents community, togetherness and shared humanity.

Ecological Momentum: Develop on the present site by optimizing existing conditions. Work with factors like soil types, current grading and water drainage rather than working against them.

Ecological Subregions: Unique and intact ecozone subregions native to the area blended into the campus landscape: Montane, Foothills Parkland, Foothills Fescue and Upper / Lower Foothills.

A Healing Campus:
A comprehensive campus plan that enhances and expands the exceptional programs dedicated to promoting mental health and well-being for at-risk youth on the Hull Services Woodpark Avenue Campus. The aim is to create a conceptual framework for the campus that aligns with the core values and vision of Hull Services, fostering an environment conducive to both education and healing.

The Guiding Elements
