

Downtown Flood Barrier and Eau Claire Promenade

Jaipur Bridge Replacement

Centre St. Ramp Upgrades

3 Avenue S. Walking and Wheeling Upgrades

Eau Claire Plaza

What's happening?

The City of Calgary is investing in Eau Claire and making improvements that combine:

- flood protection
- lifecycle improvements
- enhanced safety measures and
- the goal of building and maintaining downtown vibrancy.

Removing a tree is a last resort. However, about 160 trees will need to be removed on the Bow River's south side between fall 2020 and summer 2021.

How will the trees be replaced or restored?

Over 110 trees, shrubs and flowers will be replanted in the area.

Many trees will be repurposed in:

- fish compensation projects
- Natural Play spaces in the city
- habitat restoration work for fish and wildlife
- planting beds on Prince's Island

We know that the trees in Eau Claire are important to our city and the community, and we are working to preserve as many trees as possible.
