

Community Planning – Development Engineering Bulletin October 19, 2026

Subject: Updated Construction Drawing Comment Sheet – Effective: November 1, 2026

Effective November 1, 2026, the updated Construction Drawing Comment Sheet will be implemented. The revised sheet updates the appropriate group names and provides greater clarity on when design approvals are granted and when permission requests may be submitted.

Key Updates

- Reviewer group names updated.
- Reviewers now have the option to provide a partial approval, giving applicants greater clarity when preparing a permission request.
- New check boxes for Development Commitments for roads oversize and deferred construction obligation.
- New permission recommendation boxes for Mobility and Utility Generalist. Applicable box will be checked when giving authorization to submit the permission request. This clearly distinguishes design approval from specialist, versus having authorization to proceed with the permission request.

As with the current process, the updated Comment Sheet must continue to be included at the front of all construction drawing packages.

If you have questions about the updated Comment Sheet, please contact Olive.Rutherford@calgary.ca.
