

Wings to fly

A project that aims to make people continue to believe in their dreams, to imagine that faith can make them fly

Material:
Metal, Acrylic
Size: 4 meters

The design will be assembled following the manufacturer's instructions, the wing will be purchased from Alibaba's China website and the name "believe" will be added by soldering.

Overall budget project will be approximately \$5,000

You can check more details about the product and how the project will work

Watching a video made by me demonstrating my project:
