

# Marda Loop Main Street Mobility Network Changes After Construction

## Ultimate Traffic Operations: 33 and 34 Avenue S.W.

Construction on the Marda Loop Main Street project is wrapping up in fall 2025, with exciting roadway and streetscape improvements between Crowchild Trail and 17 Street S.W.

The improvements will meet the traffic and pedestrian needs of today and connecting with the rich history of Marda Loop – while more effectively handling Calgary’s at-times unpredictable weather.

## Traffic improvements in Marda Loop

As one of Calgary’s iconic inner-city communities, people flock to Marda Loop as a place to gather, shop, dine and live. With the growing interest in the area, the Marda Loop Main Street project focused on creating a more accessible community for all modes of transportation – including vehicles, pedestrians, cyclists and more.

With wider sidewalks and multiuse pathways to safely access the area on bikes and scooters, along with rebuilt roadways and utilities relocated underground, we’re improving how traffic and pedestrians access and experience Marda Loop.
