

Inglewood Ramsay City Projects Update – September 2019

Inglewood Sanitary Trunk – Construction Update

This September, crews are installing the section of pipe that runs under 11 Street S.E., from Crossroads Market to the CP Rail Bridge. To minimize impact to residents and commuters, we are using a process called microtunnelling. This allows crews to install pipe by tunnelling underground instead of digging trenches in the road. As work progresses northbound down 11 Street S.E., there will be rotating closures of sections of the southbound curb lane and sidewalk. The inside lane will remain open to accommodate southbound traffic. Each closure is expected to last 5-8 days.

Residents adjacent to the work starting at shafts 1 and 2 in January 2020 will receive an invitation mid-September to information sessions being held in October. This will be an opportunity to speak with the project team about impacts specific to their area.

For more information or to view a map of the planned alignment, please visit calgary.ca/IST.

9 Avenue S.E Route Improvements - Construction Update

Construction has started to improve the safety and mobility for people who bike, walk and drive along 9 Avenue S.E. between 15 and 20 Street. It is scheduled to take approximately eight to ten weeks to complete.

Currently, one vehicle travel lane at a time under the Blackfoot Trail and 9 Avenue S.E. underpass will be closed Monday through Sunday.

- Eastbound lane is closed from 6 a.m. to 3 p.m. and 6 p.m. to 6 a.m. (non-peak direction)
- Westbound lane is closed from 3 p.m. to 6 p.m.
- Flaggers are in the area between 6 a.m. to 6 p.m. to prioritize bus movements. After 6 p.m. buses will be detoured for eastbound traffic.
- Work will occur between 6 a.m. and 11 p.m. and take approximately three to four weeks to complete.

In addition, transit routes will be impacted until Tuesday, September 17. Please plan your trip accordingly. You can find information on transit [detours and temporary stops here](#).

For more information on the project and additional construction timelines, please visit calgary.ca/9aveimprovements.

MAX Purple BRT - Construction Update

Crews were working over the Labour Day long weekend to finish up the last major intersection work at:

- Blackfoot Trail and 19 Street S.E.
- 17 Avenue S.E. between 26 and 28 Street S.E.

In Inglewood, all pathways that were closed as part of the construction, opened as of September 3, 2019. We thank you for your patience as we've been completing work in the community.

International Avenue public art

As part of this project, we committed to investing in public art along International Avenue. Up to six opportunities exist for artists or artist teams with ties to the area to work along International Avenue. While the artist selection process is underway, we are currently engaging with community members to learn which locations along International Avenue are best for new art.

If you have ideas as to where you would like to see art, please [let us know](#).

Green Line - Project Update

Over the next four months, we are evaluating potential Green Line LRT alignment changes from 16 Avenue N in Crescent Heights to Ramsay. This evaluation will ensure the project can be delivered within its \$4.9B budget while also maintaining its vision.

Once we complete our evaluation, we will recommend a revised route and station location plan. We will share these recommendations with Calgarians later this fall and then present them to Council for approval in January 2020.

For more information, visit calgary.ca/greenline.

9 Avenue S.E. Bridge Replacement – Project Update

Onsite display: We have set up an onsite display in the northwest corner of the site, along the River Walk, where we will be:

- Providing on-site project updates
- Recounting the history of the bridge and area
- Introducing Calgarians to the historical interpretation pieces that we're installing with the new bridge, as a tribute to the original bridge

Currently, we've posted an update about the overall project scope, the work that's underway and some historical images of the area before the bridge was in place. We'll

be updating the display with new information mid-September.

Preserving the bridge: The University of Calgary's Department of Anthropology and Archaeology, recently published a digital archived rendering of the 9 Avenue S.E. bridge using terrestrial laser scanning. Archiving the bridge is a University of Calgary initiative: preserving Alberta's Diverse Cultural Heritage. You can check out their work on the "[Capture to Preserve](#)" website.

Construction update: Crews are almost finished building the temporary work platform underneath the old bridge. Once finished, they will begin removing the old bridge. We expect this work to begin during the week of September 9.

Nature Centre at the Inglewood Bird Sanctuary - Closed for Renovations

The Nature Centre at the Inglewood Bird Sanctuary will be closed until Fall 2020 for renovations. During that time, an additional classroom and meeting space will be added, as well as general lifecycle on the building. Until October you may also see some programs operating out of the Walker House and an outdoor tent.

The sanctuary will remain open to the public – pathways are open, gardens maintained, portable toilets will be on site, and the birds, muskrats, and deer all plan on sticking around. We encourage you to come and enjoy the park – just bring a water bottle as there won't be fountains. We also ask you to please pay attention to the signage on site as it provides safety and access information.
