# Average September/October 2015 Bicycle Volumes

16 Hour (06:00-22:00) 2-Way Totals

The data in this map are 2-way volumes collected on a single weekday in 2015, factored to represent the average September/October volume. Factors were calculated based on 13 automated count stations. The data came from a variety of sources including:

- 6 hour bike turning movements
- 16 hour screenlines (cordon counts)
- 24 hour count stations/24h Miovision count

6 hour counts were factored by 1.79 to estimate 16 hour volumes using automated counter data. Only segments, within the map boundary, where 2015 data was available, are depicted on this map.
