

# Average September/October 2016 Bicycle Volumes

## 16 Hour (06:00-22:00) 2-Way Totals

The data in this map are 2-way volumes collected on a single weekday in 2016, factored to represent the average September/October volume. Factors were calculated based on 13 automated count stations. The data came from a variety of sources including:

- 6 hour bike turning movements by Miovision camera
- 16 hour screenlines (cordon counts)
- 24h bike pathway by Miovision camera
- Permanent eco-counter station

6 hour counts were factored by 1.9 to estimate 16 hour volumes using automated counter data & 24h Miovision counts. Only segments, within the map boundary, where 2016 data was available, are depicted on this map.  
17 Ave SW was under construction in Sep. 2016
