

Improvements to Bowness Road will create more transportation choices for people who live, work and play in the area. Sharing the road is easy, whether you are walking, cycling or driving. **Learn more about moving together safely below.**

Dashed green pavement

- Is applied at driveway locations where people cycling and driving may cross paths.
- Reminds people driving to watch for and yield to people cycling when turning.

When driving

- Take extra care when backing out of an angled parking stall.
- Expect to see people cycling and ensure the bike lane is clear before reversing.
- Left turns across the painted median will still be permitted. Ensure the bike lane is clear before turning.

When cycling

- Take extra care when travelling behind angled parking.
- If a car has begun to back out of a parking stall, please give them space to back out safely.
