Legend

Proposed road	Road closures	Proposed pathway/sidewalk	Potential property impacts - Building	Proposed bus stop
Proposed bridge	Lane count/direction	Proposed pedestrian bridge	Potential property impacts - Grading	Existing LRT
Traffic signal	Proposed bike route	Existing pathway / sidewalk	City owned property	Pedestrian / bike opportunities
Proposed wall	Existing pedestrian bridge	Existing on street bike route	Proposed park space	Parks opportunities
			Community places of interest	Noise protection opportunities

Phase 4 - Concept Evaluation Workshop Concept Scorecard

Review the concepts and evaluate how well each concept meets the 11 project goals:

1 = Does not meet goal; 2 = Meets goal somewhat; or 3 = Meets goal well.

Project team members are available at your table if you have any questions about the concepts or exercise.

Key Principle	Project Goal	Bow River Crossing (Short-Term Improvements)	
		Evaluation of: Bridge Widening	Comments
Key Principle #1: Maintain and Enhance Bordering Communities	Prioritize concepts that fit within existing City-owned lands over concepts that require purchasing private property.		
	Address how changes to Crowchild Trail affect traffic patterns and safety in bordering communities.		
	Recommend current and visually-pleasing ways to reduce traffic noise along Crowchild Trail.		
	Enhance green spaces, park spaces and pathways along the Crowchild Trail corridor.		
Key Principle #2: Improve Travel Along the Corridor	Provide continuous pedestrian and cycling routes nearby, but not on, Crowchild Trail to connect major destinations along the corridor.		
	Provide for convenient, high capacity, high frequency bus service along Crowchild Trail.		
	Enhance the Crowchild Trail corridor to better fulfill its role as a primary route for delivery of emergency response and health services, and for connecting to major destinations.		
	Provide for more continuous traffic flow on Crowchild Trail that addresses bottleneck points and traffic weaving.		
Key Principle #3: Improve Mobility Across the Corridor	Enhance the safety and accessibility of transit stops throughout the Crowchild Trail corridor.		
	Enhance pedestrian and cycling access across Crowchild Trail, both in the number and quality of crossings.		
	Ensure alternate access is provided for bordering communities and businesses if access to Crowchild Trail is removed or changed.		
Project Team Evaluation: City Policy	Support community redevelopment by aligning the Crowchild Trail corridor with community planning policies including the Municipal Development Plan, Area Redevelopment Plans, and the Main Streets initiative.	3	Upgrades to the Bow River Bridge support anticipated growth from approved developments along the Crowchild Tr. corridor such as Currie Barracks, West Campus, and the Foothills Hospital Cancer Centre.
	Support Crowchild Trail's role in the Calgary Transportation Plan as a critical network connection between north and south Calgary, and a vital link to east-west routes.	3	Upgrades to the Bow River Bridge improve flow at a key bottleneck point by addressing lane continuity and improves east-west connections from Bow Tr. to Memorial Dr. by relocating on-ramps to the right-hand side of the bridge.

Description of Evaluation

1 Does not meet goal

2 Meets goal somewhat

3 Meets goal well
