

## Green Buildings Priority Stream Entry Pathway #5 Passive House Canada Certified Building

- A. Available to all buildings seeking a Passive House Canada Certification managed by Passive House Canada.
- B. The following information must be provided with the submission of a Development Permit application:
  - a. A letter from a Certified Passive House Designer/Consultant:
    - i. Confirming they have been retained as a consultant on the project.
    - ii. Summarizing the main Passive House criteria from the preliminary Passive House Planning Package (PHPP).
    - iii. Including the key design strategies to achieving certification.
- C. Visit [Passive House Canada](#) to learn more about available Passive House Building Certifications.
