

**Green Buildings Priority Stream
Entry Pathway #7
CaGBC Zero Carbon Building**

- A. Available to all buildings seeking the CaGBC Zero Carbon Building Certification managed by Canada Green Building Council.
- B. Eligible projects must provide the following information when submitting a Development Permit application:
 - i. A completed ZCB-Design Excel workbook including preliminary energy and operational carbon data.
 - ii. Calculations showing the thermal energy demand intensity (TEDI) performance of the building.
 - iii. A narrative about what embodied carbon mitigation activities have taken place to date.
 - iv. A written project description explaining which two impact and innovation strategies the project plans to pursue.
- C. Visit [Canada Green Building Council](https://www.ca gbc.ca) to learn more about the Zero Carbon Building Certification.
