

# Woodbine Lift Station upgrades

August 2022

## Background

When water runs down a sink, drain or toilet, it becomes wastewater. Calgary has a system just for wastewater, moving it by gravity and pumps to one of three wastewater treatment plants. The Woodbine Lift Station is responsible for transporting wastewater from Woodbine, south of Woodacres Crescent S.W.

The Woodbine Lift Station Upgrade project will replace the electrical, instrumentation and control systems and equipment of this critical wastewater infrastructure and make minor external improvements to the building and grounds. This work will extend the expected service life of the lift station and help us to continue to provide reliable wastewater service to Calgarians.

## Project details

To manage anticipated delays on components and equipment due to global supply chain issues, the project is being completed in two phases.

The first phase will consist of exterior work, replacing the brick surround, sidewalk, eavestroughs and downspouts as well as landscaping improvements. This will improve safety and drainage around the building and property but will not greatly change the appearance of the building.

More substantial upgrades to the internal systems will be taking place during the second phase in Spring 2023.

## Schedule of work

Construction of phase one is scheduled to begin Aug. 22, 2022 and be complete by late October 2022.

## Construction impacts

- Chandos Construction personnel working on site will be parking along the green space on the east side of Woodacres Drive S.W., south of the construction site at 79 Woodacres Drive S.W., Monday to Friday during daytime construction hours (i.e., between sunrise and sunset).
- A twenty-foot container for storing equipment and materials will also be parked in front, or south, of the construction site on Woodacres Drive S.W. for the duration of phase one.
- Deliveries of materials and equipment to the construction site could cause minor traffic delays, but will not require any formal detours or road closures.
- Construction related noise will be present during the project, but will be compliant with the restrictions under the Community Standards Bylaw.
- Access to the Canada Post Community Mailbox will remain open at all times.

## Project information or questions

We apologize for the inconvenience and thank you for your patience. If you have any specific questions or concerns regarding this work, please contact 311 and reference the Woodbine Lift Station Upgrade project.
