

# Save water

while we reinforce the water main  
**Starting March 9**

We're reinforcing the current Bearspaw South Feeder Main to help stabilize the most vulnerable areas and reduce the chances of another break until the new steel pipe is ready in December. This work will take approximately four weeks.

Restrictions apply to all residents and businesses since we're primarily relying on one water treatment plant to supply the entire city and region.

**No outdoor water use is permitted and we're counting on Calgarians to reduce their indoor water use too.**

We're asking Calgarians to focus on taking the following actions that we know **make the biggest difference** to household water consumption.

Flush only when needed.

Keep showers to **3 minutes** or less.

Wash **full** loads.

Run **full** loads.
