## REPORT NOTES

Most of the statistical data in this report are derived from the Police Information Management System (PIMS) and compiled by the Centralized Analysis Unit. The numbers reported may change on a daily basis due to the dynamic nature of offences being reported and cleared. Disorder data is derived from the CAD system and is static.

To a large extent, the data in this report are based on accumulated to date information. ***(Except for the Monthly Highlights which are based on static information (i.e.: a snap-shot in time).***

- For offences based on accumulated to date information, the number of offences recorded may be higher than previously reported (i.e. in previous statistical reports) due to late reporting. Although this does not greatly affect the number of occurrences for all offences, for some categories it may be as high as a 30-40% increase. The published data for the current period can therefore be expected to increase as time passes. As a result, readers should exercise caution when making comparisons between historical data and current data (i.e. previous year to this year) as data for the historic period will now include late reported offences, but data for the current period will not at this time. To achieve an effective comparison, current data should be evaluated against the originally published data for the historic period.
- Likewise, late reporting affects the number and percentage of offences cleared. Cases are often cleared months and sometimes years later. Consequently, clearances for previous years may appear to be much higher than those of the present year. Cases “cleared by charge” and those “cleared otherwise” are included in these totals.
- For offences based on “static” or “snap-shot” information, data totals will only reflect the number of offences reported in the original publication. They are not updated. Although late reporting may occur, and offences may continue to be cleared as time passes, these new events are not taken into account when preparing this statistical report.

A single incident may result in multiple offences, with each unique *Criminal Code* violation within the incident being counted as an offence. Furthermore, person crime offences are typically counted by the number of victims. Please note that offences are assigned to the month in which the offence "started", not the month they were reported or cleared. Also note that “attempted” incidents are included in these totals. For a more detailed explanation of the Offence counting procedure, please contact the Centralized Analysis Unit.

## Monthly Highlights – STATIC NUMBER COMPARISON

To reduce the impact of late reporting, comments on this page are a comparison between the CPS February 2016 Statistical Report and the CPS February 2015 Statistical Report. To achieve an effective comparison, current data should be evaluated against the originally published data for the historic period.

### FEBRUARY 2016

#### PERSON CRIME

- ◆ Reported **person crimes** for the month of February 2016 increased 9.4% when compared to February 2015 (673 offences in February 2016 vs. 615 in February 2015). Additionally, person crimes recorded 14.7% higher than the five year average for February.
- ◆ Total **robbery** offences for the month of February 2016 increased by 15% when compared to February 2015 (69 offences in February 2016 vs. 60 in February 2015).  
In February 2016 there were:
  - 2 **financial robberies** (compared to 1 in February 2015);
  - 25 **commercial robberies** (compared to 13 in February 2015);
  - 38 **person robberies** (compared to 42 in February 2015); and
  - 4 **home invasions** (compared to 4 in February 2015).
- ◆ **Assaults** increased 17.3% this month (528 offences in February 2016 vs. 450 in February 2015).
- ◆ **Sex offences** decreased 24.1% this month (41 offences in February 2016 compared to 54 in February 2015).

#### PROPERTY CRIME

- ◆ Reported **property crimes** this month increased 19.2% when compared to February 2015 (4108 offences in February 2016 compared to 3446 in February 2015). Additionally, property crimes recorded 53.1% higher than the five year average for February.
- ◆ **Vehicle theft** (including attempts) decreased 0.9% this month when compared to February 2015 (570 offences in February 2016 vs. 575 in February 2015).
- ◆ **Theft** offences increased 23.7% this month when compared to February 2015 (2065 offences in February 2016 vs. 1669 in February 2015).
- ◆ **Break and enter** offences this month increased 24.9% when compared to February 2015 (692 offences this month compared to 554 in February 2015).
  - **Residential break and enter** offences this month increased 0.9% when compared to February 2015 (214 offences in February 2016 vs. 212 in February 2015); and
  - **Commercial break and enter** offences increased 48.9% this month when compared to February 2015 (353 offences in February 2016 vs. 237 in February 2015).
- ◆ **Fraud related** offences increased 59.6% this month (249 offences in February 2016 vs. 156 in February 2015).

## Calgary Person Crime Statistics – STATIC NUMBERS

The static crime numbers on this page are derived from historical Calgary Police Service Monthly Statistical Reports. These statistics are used when writing the Monthly Highlights page in order to make a fair comparison using data which has not been allowed to increase due to late reporting of crime. Using static numbers allows us to compare crime levels at a specific point in time and make an accurate determination of increases or decreases. The cumulative crime numbers (pages 8 – 11) are statistics derived from the CPS Police Information Management System. P.I.M.S. cannot produce static numbers and therefore the cumulative numbers reflect any late reporting of crime. To achieve an effective comparison, current data should be evaluated against the originally published data for the historic period. \*Due to the dynamic nature of ongoing homicide investigations these numbers may have been manually updated to reflect the current homicide count. Due to manually updating, it's possible 1 or more homicides may be reflected within the assault category. The homicide counts are provided by the homicide unit.

<b>Total Reportable Collisions</b>	<b>3575</b>	<b>2864</b>	<b>2633</b>	<b>7404</b>	<b>7013</b>	<b>5817</b>	<b>619.5</b>	<b>569.7</b>	<b>472.6</b>

Source: Cumulative data; PIMS (March 2016)

NOTE: Total Reportable Collisions exclude collisions along private roadways or public parking lots.

The number of reported traffic collisions may continue to increase over time. Due to data collection and reporting methods, totals for the current month may not be comparable to previous years.

\* e-Collision reporting is a data system which became operational in July 2009. At the time this report was published it was not possible to separate all collisions based on level of severity or to determine whether they occurred in a parking lot. Therefore, as e-Collision reports are completed and entered into the CPS records management system, it is determined whether or not they are reportable, and they are removed from the e-Collision count total and reclassified based on level of severity.

## Top Collision Locations and Primary Cause of Events

Number of Collisions	Location	Primary Cause of Event	Primary Direction of Travel
15	Deerfoot Trail SE & Glenmore Trail SE	Rear End	E
14	Deerfoot Trail NE & Memorial Drive E	Rear End	S/E
12	Deerfoot Trail NE & 16 Avenue NE	Rear End	W
10	Deerfoot Trail SE & 17 Avenue SE	Rear End / Sideswipe – Same Direction	N
9	Elbow Drive SW & Glenmore Trail SW	Rear End	S/E
9	Glenmore Trail SW & 14 Street SW	Rear End	E/W
9	16 Avenue NE & 36 Street NE	Rear End / Sideswipe – Same Direction	W
9	130 Avenue SE & 52 Street SE	Rear End	E
8	Crowchild Trail SW & 17 Avenue SW	Rear End	N
8	Deerfoot Trail NE & 32 Avenue NE	Rear End / Sideswipe – Same Direction / Left Turn Across Path	N/S

When interpreting these data, it is imperative to consider that these figures represent only the number of collisions and they do not account for associated traffic volumes, weather conditions, collision types, driver experience, or any other variables which may or may not be significant factors. The locations denoted might be associated with intersections, on/off ramps, or mid-block locations, which are in close proximity but not necessarily at the exact specified locations. Collisions occurring on private property, such as shopping mall parking lots have been excluded from the data in order to strictly assess intersection related collisions.

NOTE: This table excludes reports made through the e-Collision reporting system.
