Tie in with future Main Streets Project

Tie in with approved North Shaganappi Trail Corridor Study recommended plan

Long term 43 Street design to reflect preferred short term design idea.

Multi-use pathways on both sides of Shaganappi Trail as per the North Shaganappi Study.

LIMIT OF STUDY

LIMIT OF STUDY

Realign Shaganappi Trail to the west due to intersection grading and construction staging requirements

Potential future pathway connection (subject to geotechnical review).

Tie in with future 16 Avenue Corridor Study

New pathway connection to McKay Road bicycle route.

Ramp from westbound 16 Avenue to northbound Bowness Road removed.

Ramp from northbound Bowness Road to westbound 16 Avenue removed.

Ramp from westbound 16 Avenue to southbound and northbound Shaganappi Trail removed.

Tie in with future 16 Avenue Corridor study

Eastbound to southbound ramp is not included to maintain flexibility for future land repurposing.

Proposed pedestrian overpass

Potential property impacts due to grading

Ramp from southbound Bowness Road to eastbound 16 Avenue removed.

Potential pathway

New bridge structures required for widened 16 Avenue and new ramps.

Reconfigured interchange at Shaganappi Trail and 16 Avenue with two new signalized intersections.

Ramp from southbound Shaganappi Trail to eastbound 16 Avenue removed.

Proposed pathway connection to the Bow River.

Existing pathway relocated closer to road right of way

One additional travel lane in each direction.

Proposed cycle tracks.

Pathway and road connection to be reviewed in future land use study.
